Education

Indian Institute of Technology, Jodhpur

Bachelor of Technology, Electrical Engineering

Aug 2024 – Present

CGPA: 7.65

Shree Subhash Bose Senior Secondary School, Ladnun

Senior Secondary (Class XII)

Apr 2023

94.40%

Projects

PrepAI | AI Interview Preparation Platform | GitHub

Mar 2026 – May 2026

React.js, Node.js, Express.js, MongoDB, JWT, Google Gemini SDK, Puppeteer, Multer, pdf-parse Tech:

- Engineered a production-grade full-stack AI platform that analyzes user resume, job description, and self-description to generate a **resume-job match score**, **skill gap analysis**, **technical questions**, **behavioral questions**, and a **7-day prep roadmap** – reducing manual interview prep effort by an estimated **70%**.
- Integrated **Google Gemini SDK** with pdf-parse for resume extraction to produce structured, role-specific interview content stored in **MongoDB** via Mongoose with full **CRUD** support.
- Implemented **cookie-based JWT authentication** with protected REST API routes and React Context session management, including automatic token-expiry redirect to login.
- Built server-side **ATS-resume PDF generation** via Puppeteer streaming binary output directly to the browser, and a global **Axios interceptor** eliminating per-route HTTP 401 handling entirely.

Recipe Recommendation System | GitHub | Live

Feb 2026 – April 2026

Full-stack ML web app serving real-time recipe recommendations over a dataset of 1,000+ recipes. Tech: Python, Flask, scikit-learn, TF-IDF, PCA, KMeans, KNN, React.js, Tailwind CSS

- Built a multi-modal feature pipeline combining **TF-IDF** on ingredients, **One-Hot Encoding** for cuisine, and **MinMax Scaling** for cook time – improving recommendation relevance **~25% over a TF-IDF baseline**.
- Applied **PCA** (50 components) for 60% dimensionality reduction; used **KMeans + KNN** for cuisine classification, achieving **~88% 5-fold cross-validation accuracy**.
- Exposed dual-mode querying (**Cosine Similarity** and **Euclidean Distance**) via two dedicated **Flask REST API** endpoints with **CORS** handling and **JSON** validation, consumed by a **React.js** frontend.

Full-Stack Portfolio Website | GitHub | Live

Nov 2025 – Jan 2026

React.js, Node.js, Express.js, Three.js, Framer Motion, Resend Tech:

- Built a full-stack portfolio website with a **React** frontend and **Node.js/Express** backend.
- Added an interactive **3D background** using **Three.js** to enhance visual experience.
- Developed a **REST API** for contact form with server-side validation and email delivery using **Resend API**.
- Designed a responsive and user-friendly interface using modern frontend practices.

Technical Skills

Languages: JavaScript (ES6+), Python, C, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Three.js, Framer Motion

Backend: Node.js, Express.js, Flask, REST APIs, JWT Authentication, Middleware,

Database: MongoDB, Mongoose ODM

AI / ML: Google Gemini SDK, NumPy, Pandas, Scikit-learn, TF-IDF, PCA, KMeans, KNN, Matplotlib

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, Google Colab, Puppeteer

Relevant Coursework

Data Structures & Algorithms

Machine Learning

Linear Algebra
